Annual inflation adjustment

Tariffs that apply up to the 2020 calendar year have been escalated for each year commencing 1 January in accordance with the following:

$$P_n = P_{base} \times \left[1 + 0.75 \times \frac{CPI_{n-1} - CPI_{base}}{CPI_{base}} \right]$$

Tariffs that apply from the 2021 calendar year have been escalated for each year commencing 1 January in accordance with the following:

$$P_n = P_{2020} \times \left[1 + \frac{CPI_{n-1} - CPI_{2019}}{CPI_{2019}} \right]$$

Where:

P_n	the applicable tariff for the n calendar year
P_{base}	the applicable tariff for the base year
CPI	Quarterly Consumer Price Index, 6401.0 (All Groups weighted Average of Eight Capital Cities) published by the Australian Bureau of Statistics
CPI_{n-1}	the indicator for the CPI for the December quarter immediately preceding the n calendar year
CPI_{base}	the indicator for the CPI for the December quarter immediately preceding the base year
CPI_{2019}	the indicator for the CPI for the 2019 December quarter
